

Tring Park Arts Education School

0830

Two new performance studio buildings provide additional teaching accommodation to the Hertfordshire co-educational boarding school. The new buildings, each 10m x 12m and joined by an access corridor, provide five new performance studios within the grounds of the school. The existing school is housed in a former Rothschild Mansion and the Architect worked closely with English Heritage and Dacorum Council to gain approval for phase one of a three-stage £13m overall development.

SERVICES

structural design of timber superstructure
supply and installation of timber structure

MATERIALS

crosslam, glulam, cassettes
exposed timber finish throughout
